## **DETAILED ACTION**

### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

2. Authorization for this examiner's amendment was given in a telephone interview with Bill R. Naifeh on May 6, 2005.

The application has been amended as follows:

**Cancel claim 7.**

### ***Response to Arguments***

3. Applicant's arguments, see page 8, final paragraph, filed December 10, 2004, with respect to claim 11 have been fully considered and are persuasive. The rejection of claim 11 under 35 U.S.C. 102(e) as being anticipated by Kuroda (U.S. Patent 6,732,074) has been withdrawn.

Furthermore, independent claims 12 and 19 have been amended to incorporate features of claim 11 not found in Kuroda (i.e. *assessing the adapted reference*), and thus the rejections of claims 12 and 19 are withdrawn.

***Allowable Subject Matter***

4. Claims 3-6, 8-13, and 15-19 are allowed.

The following is an examiner's statement of reasons for allowance:

The applicant's arguments on page 8, final paragraph that Kuroda does not disclose "assessing the adapted reference by determining the distance between the adapted reference and at least one of the currently valid references" is persuasive. Furthermore, the prior art of record does not disclose and would not suggest to one of ordinary skill in the art at the time of invention the step of assessing an adapted reference by using a distance measurement between the adapted reference and a currently valid reference.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Goronzy et al. (U.S. Patent 6,799,162) disclose a system that simultaneously recognizes input speech with an adapted reference and a currently valid reference, and decides whether to continue using the adapted reference based on a comparison of the confidence measurement of the adapted reference and the currently valid reference.
